Burn-Rite® 1 to 7 DVD Duplicator

DVD Duplicator Features

Burn-Rite® multi-target DVD/CD duplicator series are optimised to produce successful copies of your critical data in the shortest possible time, whilst maintaining your data integrity. This model uses a more advanced 16x speed capable controller with 64MB buffer memory.

Easy to use - no need to connect to a PC or Mac! Simply select the source disc and the duplicator will automatically detect the format of the disc that you have selected. Insert seven blank discs and the DVD duplicator will automatically start the duplication process. If less copies are required, simply insert the required number and press Run!

The Burn-Rite® DVD duplicator range incorporates intuitive technology to avoid failures due to buffer problems and includes media write speed optimisation to facilitate successful duplication.

- ★ Standalone operation - no PC required.
- ★ Copy directly from disc to disc - no need to store data on a hard disk.
- ★ Multi-format DVD and CD duplication - supports most CD/DVD formats including DVD-R/ DVD+R.
- ★ Unique cross format duplication - copy your data from DVD-R to DVD+R and vice versa.
- ★ Copy and compare option - to compare the master to the copies (doesn't apply to audio discs).
- ★ Batch counter - counts the number of successful copies from your master DVD or CD.
- ★ Stable, consistent duplication performance - reliable performance when used with quality media.
- ★ Excellent price to performance ratio - ideal for reliable low cost DVD or CD duplication.
- ★ Streamlined buffer optimisation™ - supports 8x speed Disc to Disc writing to all seven DVD writers.
- ★ Auto start technology™ - no need to press go if the maximum number of copies required.
- ★ Auto format recognition™ - automatic detection and selection of master disc format.
- ★ DirectFlash™ support - Supports direct firmware updates of fitted drives "in situ". Saving you time and effort when future updates are needed for your DVD writers.

Available in Beige or Black
